

JERIC C. MANGAO

Senior Software Engineer

Batangas, Philippines
+63 955 399 7877
mangaojeric0505@gmail.com

TECHNICAL SKILLS

Backend

Laravel • CodeIgniter 3/4 • REST APIs • Queue Workers • Cron Jobs

Frontend

Blade • Vue.js • jQuery • Bootstrap • Tailwind CSS • React • JS

Database

MySQL • MariaDB • Schema Design • Query Optimization • Stored Procedures • Data Migration

DevOps & Tools

Docker • Laravel Forge • Linux • Apache • Nginx • SSH • Git • Composer • NPM • Vite

CMS

Laravel Filament • Laravel Nova • WordPress • Shopify (Liquid)

Integrations

Xero • Stripe • PayPal • Google Maps • SMS Gateway • Viber API

PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience designing, developing, maintaining, and modernizing enterprise web applications using Laravel, PHP, and CodeIgniter. Strong background in backend architecture, REST API development, database design, legacy system modernization, application-level security, production deployments, and stakeholder collaboration. Experienced in secure enterprise CMS development, warehouse and ordering platforms, business workflow automation, and third-party integrations including Xero, Stripe, PayPal, Google Maps, SMS Gateway, and Viber API.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

CMIT Consultancy Group Inc. | Aug 2023 – Present

Environment: Laravel, Laravel Filament, Laravel Nova, PHP, MySQL, RBAC, Audit Logs, Secure Uploads, Git

- Implemented application-level security for enterprise Laravel and Filament systems, including RBAC, permissions, maker-checker workflows, audit logging, secure file upload validation, and malware scanning.
- Built and maintained secure admin modules using Laravel Filament and Laravel Nova, supporting enterprise CMS and back-office operations.
- Participated in sprint planning, requirement analysis, technical solution design, code reviews, and implementation planning with internal teams and stakeholders.
- Managed production-ready Laravel implementations with focus on security, maintainability, and business process reliability.

Software Engineer (Part-Time)

Valeysoft | Mar 2023 – Present

Environment: CodeIgniter 3, PHP, MySQL, jQuery, Bootstrap, Xero API, REST APIs, Linux, SSH, Git, Docker, Forge

- Lead backend development and ongoing modernization of Koala Toolkit, a large legacy CodeIgniter 3 enterprise platform supporting warehouse operations, ordering, inventory, customer management, reporting, and financial workflows.
- Designed, optimized, and extended backend modules on a high-volume MySQL database with million-row datasets, improving business workflows while maintaining production stability.
- Designed and implemented Xero integrations across Customers, Items, Ranges, Orders, and Invoices to improve accounting synchronization and reduce manual reconciliation work.
- Developed Production Planning functionality that streamlined purchasing and inventory planning, reducing manual stock ordering effort for users.
- Handled production deployments, troubleshooting, server-side updates, and safe release practices including backups and rollback preparation.

EDUCATION

BS Computer Science

Tanauan Institute
2014 – 2018

KEY STRENGTHS

- Legacy system modernization
- Enterprise backend development
- REST API & third-party integration
- Database design & optimization
- Application-level security (RBAC)
- Production deployment & support
- Sprint planning & estimation
- Stakeholder communication

Software Engineer

Parlon Inc. | Jul 2022 – Jul 2023

Environment: Laravel, PHP, Vue.js, REST APIs, MySQL, JavaScript

- Developed and maintained Laravel-based booking and marketplace systems serving business users and customers.
- Designed and optimized REST APIs for internal features and third-party integrations, improving reliability across connected workflows.
- Collaborated with frontend engineers to integrate Vue.js components with Laravel backends and deliver production-ready features.

Software Engineer

Yondu Inc. | Jul 2021 – Jul 2022

Environment: PHP, Backend Services, APIs, Microservices, Agile

- Developed and maintained backend services powering the GLife mobile application ecosystem.
- Improved API reliability and participated in code reviews, agile delivery, and production support activities.

Software Engineer / Medichem Developer

Information Professionals Inc. (IPI) | Oct 2020 – Jul 2021

Environment: PHP, MySQL, Viber API, QR Code Systems

- Built custom PHP applications for internal pharmaceutical operations, data management, and compliance-related workflows.
- Developed Viber chatbot integrations and QR code-based tracking systems for inventory and operational monitoring.

Web Developer

Hubware Inc. | Feb 2020 – Jul 2020

Environment: C#, ASP.NET MVC

- Developed and maintained internal government tools using C# and ASP.NET MVC.
- Supported digitization of city workflows, improving administrative process efficiency.

Web Developer

Naotech Inc. | May 2018 – Jan 2020

Environment: Laravel, PHP, MySQL, JavaScript

- Maintained and supported multiple client web applications built with Laravel and PHP.
- Implemented new features, fixed production issues, and participated in QA and bug resolution processes.
