[jeric-mangao-portfolio.vercel.app](#) | Available immediately | Open to any work schedule
8+ Years Experience | 15+ Enterprise Systems Delivered | 1M+ Database Rows Optimized

PROFESSIONAL SUMMARY

Senior Full-Stack PHP Developer with 8+ years of experience building, modernizing, and maintaining business-critical web applications. Specialized in PHP, Laravel, CodeIgniter, Vue.js, MySQL, RESTful APIs, Laravel Filament, and Laravel Nova, with deep experience in legacy-system modernization, application security, database optimization, third-party financial integrations (Xero, Stripe, PayPal), and production deployment ownership. Experienced in requirements gathering, sprint planning, technical solution design, and direct stakeholder and client collaboration. Proven ability to independently own projects end-to-end, from architecture through production deployment and support.

TECHNICAL SKILLS

Backend	PHP, Laravel, CodeIgniter 3/4, REST APIs, Laravel Filament, Laravel Nova, Queue Workers, Cron Jobs, Composer
Frontend	JavaScript, Vue.js, React, jQuery, Bootstrap, Tailwind CSS, HTML5, CSS3, Blade, Vite, Inertia.js
Databases	MySQL, MariaDB, MongoDB, Schema Design, Query Optimization, Stored Procedures, Data Migration
DevOps	Git, Docker, Linux, Apache, Nginx, SSH, Laravel Forge, cPanel, CI/CD, Production Deployment
Integrations	Xero, PSE API, Stripe, PayPal, Google Maps, SMS Gateway, Viber API
Additional	C#, ASP.NET MVC, WordPress, Shopify Liquid, Application Security, RBAC, Audit Logging, Code Review, Sprint Planning, Requirements Analysis

PROFESSIONAL EXPERIENCE

Senior Software Engineer | CMIT Consultancy Group Inc. | Makati City, Philippines

August 2023 – July 2026 (role concluded as part of a company-wide restructuring)

- Designed and developed enterprise web applications using Laravel, Laravel Filament, Laravel Nova, PHP, MySQL, JavaScript, and RESTful APIs, including CMS platforms spanning 40+ database tables across singleton and CRUD resource structures.
- Implemented application-level security including role-based access control, granular permissions, maker-checker approval workflows, audit logging, secure file validation, and malware scanning.
- Built and maintained custom content-management systems, administrative portals, and back-office modules for corporate and public-facing websites.
- Participated in requirements gathering, sprint planning, technical solution design, code reviews, deployment preparation, and stakeholder presentations, while optimizing backend workflows and database operations for maintainability and reliability.

Software Engineer – Part-Time | Valeysoft | Remote

March 2023 – Present

- Independently lead backend development and ongoing modernization of Koala Toolkit, a large CodeIgniter 3 enterprise platform supporting orders, inventory, customers, production planning, scheduling, reporting, timesheets, and financial workflows.
- Design and optimize MySQL queries, stored procedures, reporting functions, and data-processing workflows for high-volume datasets containing millions of records.
- Integrated Xero workflows for customers, items, ranges, orders, invoices, credit notes, and payments, reducing manual reconciliation and improving financial-data synchronization, with synchronization logs and record-level success/failure metrics for observability.
- Own production deployments end-to-end — troubleshooting, server-side updates, backups, and rollback procedures — while preserving legacy-system stability.

Software Engineer | Parlon Inc. | Makati City, Philippines

July 2022 – July 2023

- Developed and maintained web applications and internal systems using PHP, Laravel, JavaScript, jQuery, and MySQL, building backend modules and administrative features based on business requirements.
- Investigated and resolved application defects and production issues, participating throughout the SDLC including testing, deployment, and maintenance.

Software Engineer | Yondu Inc. | Philippines

July 2021 – July 2022

- Developed and maintained backend services and refactored microservice endpoints powering the GLife mobile app ecosystem, improving speed and reliability under peak traffic within an Agile framework.

Software Engineer / Medichem Developer | Information Professionals Inc. (IPI) | Philippines

October 2020 – July 2021

- Engineered custom PHP applications for pharmaceutical data tracking, including a Viber Chatbot platform for operational notices and QR-code tracking systems for inventory and auditing.

Web Developer | Hubware Inc. | Muntinlupa City, Philippines

February 2020 – July 2020

- Developed and maintained internal government applications using C#, ASP.NET MVC, SQL, JavaScript, HTML, and CSS, supporting digitization of administrative workflows.

Web Developer | Naotech Inc. | Makati City, Philippines

May 2018 – January 2020

- Developed and maintained multiple client web applications using PHP, Laravel, CodeIgniter, MySQL, JavaScript, jQuery, HTML, and CSS, engaging directly with clients to gather requirements and deliver features.

SELECTED PROJECTS

Shakey's Group — shakeysgroup.ph

Public corporate website for a food and restaurant group. Led backend development and database schema design using Laravel Filament, integrated frontend templates, configured CMS structures, and coordinated release deployment.

Metro Pacific Health — metropacifichealth.com

Public corporate healthcare website built with Laravel Nova. Led backend development, content schema configuration, and production launch coordination.

A.T. Yuchengco Centre — atyc.com.ph

Public corporate property website built with Laravel Nova, presenting building, leasing, and location information. Developed and configured CMS modules and backend content structures.

Additional enterprise CMS builds (Metrobank Foundation, Element Steel, IABC, IFL, Tower Steel) delivered on Laravel Filament and Laravel Nova — summarized without public links to protect client confidentiality; details on request.

Personal Finance Hub & Baby Feeding Tracker

Personal projects: a Laravel/Vue 3/Inertia.js finance tracker (credit cards, loans, amortization, forecasting) and a mobile baby-feeding tracker. Demos and code on the portfolio site and GitHub.

EDUCATION

Bachelor of Science in Computer Science

Tanauan Institute | Tanauan City, Philippines | 2014 – 2018

ADDITIONAL INFORMATION

Available to start immediately. Open to full-time opportunities and any work schedule. Proven track record working independently and taking full ownership of production systems while communicating directly with stakeholders and clients.
